^{*}DKK 2.7m restated from Other operating income to market value adjustments in Q1 2014 relating to the reclassification of dividends to value adjustments in the subsidiary Vørður.

The following comments relate to the adjusted figures and are generally stated relative to Q4 2014. Due to seasonal variations, comments on the insurance segment are also made relative to Q1 2014.

^{**}Incl. Net income from investment activities

BANKNORDIK

Operating income

BankNordik Group generated operating income of DKK 182m in Q1 2015, which was 10% less than in Q4 2014. The decline is driven by lower insurance income in Q1 2015 compared to Q4 2014 caused by seasonal variation and higher claims in Iceland.

Net interest income

Net interest income was DKK 126m in Q1 2015 compared to DKK 125m in Q4 2014 even though interest income from bonds was lower in the quarter.

Net fees and commissions

Net fee and commission income amounted to DKK 53m in Q1 2015, up from 52m in Q4 2014 due to higher activity in mortgage lending in Q4 2014 resulting in higher fees in Q1 2015.

Insurance income, net

Income from insurance activities, net, amounted to DKK 1m in Q1 2015 compared with DKK 8m in the same period last year primarily because of a higher claims ratio in Q1 2015.

Operating and sector costs

Operating and sector costs were DKK 143m in Q1 2015, 6% higher than in Q4 2014, which is mainly caused by seasonal variation. The costs for the full year are still expected to be lower than in 2014.

Profit before impairment charges

Profit before impairment charges decreased to DKK 39m in Q1 2015 from DKK 68m in Q4 2014.

Impairment charges

Net impairment charges fell to DKK 20m in Q1 2015 from DKK 29m in Q4 2014. The impairments are caused by collective impairments amounting to DKK 5m and a DKK 15m impairment on one single corporate custumer due to reduced valuation of the collateral. These are incidents that are not expected to be commonly recurring.

Operating profit

Operating profit decreased from DKK 39m in Q4 2014 to DKK 18m in Q1 2015.

Banking: Denmark

The Danish banking activities reported a profit before impairment charges of DKK 21m in Q1 2015 from DKK 24m in Q4 2014. Including impairment charges, net, of DKK 20m, operating profit amounted to DKK 0m in Q1 2015 compared to DKK 5m in Q4 2014. The relatively high impairment charges of DKK 20m were primarily related to impairments of DKK 15m on one corporate customer due to a reduced valuation of collateral, an incident that is not expected to be commonly recurring.

Operating income in Denmark increased from DKK 95m in Q4 2014 to DKK 96m in Q1 2015, where significantly higher fee income compensated for lower net interest income. The lower net interest income is primarily explained by a lower internal interest rate in the Group – lowered from 2.5% to 1.0%. Thus net interest income from customers increased in the quarter. Operating costs increased to DKK 72m in Q1 2015 relative to DKK 68m in Q4 2014.

Lending increased by DKK 37m in Q1 2015, while deposits fell by DKK 58m in Q1 2015. The growth in lending was driven by the continued inflow of retail and corporate customers.

Note 1 Significant accounting policies

The consolidated financial statement for the first three months of 2015 has been prepared in accordance with IAS 34 "Interim Financial Reporting" supplemented by additional Faroese disclosure requirements for quarterly reports of listed financial companies and in accordance with the financial reporting requirements of the Nasdaq OMX in Reykjavik and in Copenhagen. The financial statements of the Parent Company, P/F BankNordik, are prepared in accordance with the Faroese Financial Business Act and with the executive order on financial reports of credit institutions etc. of the Danish FSA as applied in the Faroe Islands.

The application of IAS 34 means that the disclosure of figures is less detailed than the disclosure in a full annual report and that the valuation principles laid down by the international financial reporting standards (IFRS) are applied.

The Group has not changed its significant accounting policies from those followed in the Annual Report 2014. The Annual Report 2014 provides a full description of the Group's significant accounting policies.

Future financial reporting standards and interpretations

International Accounting Standards Board (IASB) has issued a number of new accounting standards (IAS and IFRS) and interpretations (IFRIC) that have not yet entered into force. None of these are expected to have an impact on the Group's future financial reporting.

Accounting estimates

The measurement of certain assets and liabilities requires management to estimate how future events will impact on the value of such assets and liabilities. Estimates of significance to the financial reporting are made in connection with determining the impairments of loans and advances, the fair value of unlisted financial instruments, provisions, business acquisitions etc. Estimates are based on assumptions that management consider appropriate but which are uncertain by their nature.

A test of the groups goodwill with indefinite life in 2014 resulted in an impairment loss in the Annual Report 2014 of DKK 200m and 50m for Denmark and Greenland respectively.

The most significant estimates that the management makes in applying the Group's accounting policies and the most important uncertainty affecting estimates made when preparing the condensed interim report are unchanged from the estimates made in connection with the preparation of the Annual Report at 31 December 2014 and the uncertainties prevailing at that time.

Determination of fair value

The fair value of financial assets is measured on the basis of quoted market prices of financial instruments traded in active markets. If an active market exists, fair value is based on the most recently observed market price at the balance sheet date.

If a financial instrument is quoted in a market that is not active, the Group bases its measurement on the most recent transaction price. Adjustment is made for subsequent changes in market conditions, for instance by including transactions in similar financial instruments that are assumed to be motivated by normal business considerations.

If no active market for standard and simple financial instruments, such as interest rate and currency swaps and unlisted bonds, exists, generally accepted valuation techniques rely on market-based parameters for measuring fair value. The results of calculations made on the basis of valuation techniques are often estimates because exact values cannot be determined from market observations. Consequently, additional parameters, such as liquidity risk and counterparty risk, are sometimes used for measuring fair value.
