Financial review

Highlights 9M 2017

- Net interest income was down by DKK 21m year-on-year, primarily due to the controlled run-off of corporate lending in Denmark but also due to a tighter interest margin.
- Net fees, commission income and dividends increased to DKK 149m in 9M 2017 from DKK 141m in 9M 2016, mostly due to higher income from asset management activity and mortgage broking services during the period.
- Operating costs increased by DKK 4m to DKK 350m in 9M 2017 from DKK 345m in 9M 2016, owing to severance payments and higher IT-costs.
- Net impairment charges on loans were a reversal of DKK 9m in 9M 2017 compared to a reversal of DKK 8m in 9M 2016.
- Operating profit fell to DKK 136m in 9M 2017 from DKK 153m in 9M 2016.
- An impairment loss of DKK 17m on the Group's head office (written down from DKK 79m to DKK 62m) was recognised as a non-recurring expenditure due to a higher discount rate applied in the valuation.
- Value adjustments were a gain of DKK 24m in 9M 2017 compared to a gain of DKK 18m in 9M 2016.
- Profit before tax was DKK 143m in 9M 2017, down by DKK 16m compared to 9M 2016, excluding the gain on sale of Vørður.

The following comments relate to the adjusted figures and are generally stated relative to Q2 2017. Due to seasonal variations, comments on the insurance segment are made relative to Q3 2016.

Operating income

The BankNordik Group generated operating income of DKK 152m in Q3 2017, down by DKK 14m from DKK 166m in Q2 2017.

Net interest income

Net fee and commission income and dividends

Net fee and commission income and dividends amounted to DKK 39m in Q3 2017 compared to DKK 58m in Q2 2017. The drop was in part due to the restructuring of asset management activity with regards to MiFID II, of which approximately DKK 6m is expected to be offset by higher dividend income/value adjustments in the future.

Net insurance income

Net insurance income amounted to DKK 13m in Q3 2017, up by DKK 4m compared to Q2 2017 and by DKK 1m compared to Q3 2016 (DKK 12m).

Operating and sector costs

Operating and sector costs amounted to DKK 114m in Q3 2017, DKK 6m less than in Q2 2017, in particular due to lower IT-costs during the quarter.

Impairment charges

Net impairment charges were a reversal of DKK 4m in Q3 2017 compared to a reversal of DKK 5m in Q2 2017.

Deposits were DKK 13.0bn, a decrease of DKK 490m compared to 30 June 2017. The decrease in deposits was due to a transitional period, in which a part of the Group's assets under management were being transferred to deposits under pooled schemes.

Liquidity invested in shares amounted to DKK 247m, up by DKK 2m relative to 30 June 2017. The surplus liquidity at 30 September 2017 was 219% higher than the statutory requirement. With regards to changes in the accounting guidelines for interim financial reporting, BankNordik has decided not to recognise net profit within a given year in the capital and solvency statement until the annual report is released in audited form.

Outlook

Management reconfirms the FY2017 guidance of profit before impairment charges, non-recurring items, value adjustments and tax in the range of DKK 150-190m (9M 2017: DKK 127m).

Previously, management expected net impairment charges on loans for 2017 to be less than DKK 20m. This figure has been revised and net impairment charges for 2017 are now expected not to be higher than zero (9M 2017: Reversal of DKK 9m).

This guidance is generally subject to uncertainty and will depend on economic conditions, including possible central bank monetary policy measures.

BankNordik Group by segment

Note that the financial results generated by the Treasury department are not recognised under these business segments, i.e. Corporate Banking and Personal Banking.

Note 1 Significant accounting policies

The consolidated financial statements for the first nine months of 2017 have been prepared in accordance with IAS 34 "Interim Financial Reporting" supplemented by additional Faroese disclosure requirements for quarterly reports of listed financial companies and in accordance with the financial reporting requirements of the Nasdaq exchange in Copenhagen. The financial statements of the Parent Company, P/F BankNordik, have been prepared in accordance with the Faroese Financial Business Act and with the executive order on financial reports of credit institutions etc. of the Danish FSA as applied in the Faroe Islands.

The application of IAS 34 means that the disclosure of figures is less detailed than the disclosure in a full annual report and that the valuation principles laid down by the international financial reporting standards (IFRS) are applied.

The Group's significant accounting policies are consistent with those applied in the Annual Report 2016. The Annual Report 2016 provides a full description of the Group's significant accounting policies.

Future financial reporting standards and interpretations

The International Accounting Standards Board (IASB) has issued a number of new accounting standards (IAS and IFRS) and interpretations (IFRIC) that have not yet entered into force. As mentioned in the Annual Report 2016 the bank currently is carrying out the necessary development work in the areas affected by IFRS 9, particularly in respect of loan impairment, in collaboration with the bank's data centre. At this stage the development work has not resulted in reliable information regarding the effect of IFRS 9, i.e. the effect on impairments on loans. Please refer to the Annual Report 2016 for further information.

Accounting estimates

The measurement of certain assets and liabilities requires management to estimate how future events will impact on the value of such assets and liabilities. Estimates of significance to the financial reporting are made in connection with determining the impairment of loans and advances, the fair value of unlisted financial instruments, provisions, business acquisitions etc. Estimates are based on assumptions that management considers appropriate but which are inherently uncertain.

The most significant estimates that management makes in applying the Group's accounting policies and the most important uncertainty affecting estimates made when preparing the condensed interim report are unchanged from the estimates made in connection with the preparation of the Annual Report 2016 and the uncertainties prevailing at that time.

Determination of fair value

The fair value of financial assets is measured on the basis of quoted market prices of financial instruments traded in active markets. If an active market exists, fair value is based on the most recently observed market price at the balance sheet date.

If a financial instrument is quoted in a market that is not active, the Group bases its measurement on the most recent transaction price. Adjustment is made for subsequent changes in market conditions, for instance by including transactions in similar financial instruments that are assumed to be motivated by normal business considerations.

If no active market for standard and simple financial instruments, such as interest rate and currency swaps and unlisted bonds, exists, generally accepted valuation techniques rely on market-based parameters for measuring fair value. The results of calculations made on the basis of valuation techniques are often estimates because exact values cannot be determined from market observations. Consequently, additional parameters, such as liquidity risk and counterparty risk, are sometimes used for measuring fair value.
