<sup>1)</sup> Comprises staff costs, administrative expenses and amortisation, depreciation and impairment charges.

"The first half of 2019 progressed well and we delivered satisfactory financial results. Pressure on interest margins continued to cause a drag on net interest income, but was countered by high customer activity and growing business volumes. Operating costs were up 4% YoY and are now expected to come in slightly higher for the full year of 2019 compared to 2018. In July, we raised our net profit guidance in response to a significant reversal of impairment charges, mirroring not only the current economic environment but also the sound credit quality of our loan portfolio," said BankNordik CEO, Árni Ellefsen.

"In Q2 2019, BankNordik partnered with the European Investment Fund to provide financing to innovative enterprises in the Faroe Islands and Greenland under the Innov-Fin programme – an EU initiative of which BankNordik is the first and currently sole partner bank covering the Faroese and the Greenlandic markets. Apple Pay was also introduced to our customers, enabling contactless purchases through the use of Apple devices," said Mr. Ellefsen.

The following comments relate to the adjusted figures and are generally stated relative to Q4 2018.

#### Income statement

Net insurance income amounted to DKK 15m in Q2 2019, up by DKK 7m compared to Q1 2019 and up by DKK 9m compared to Q2 2018, in both cases due to lower claims and increased volumes. Operating costs amounted to DKK 119m in Q2 2019, down by DKK 1m relative to Q1 2019. QoQ operating costs were adversely affected by higher staff related costs while IT and marketing costs were down.

#### Outlook

Management reconfirms the FY2019 guidance of operating profit before impairment charges in the range of DKK 160–200m (H1 2019: DKK 81m). On 22 July 2019, BankNordik raised its guidance for FY2019 net profit from DKK 100–150m as previously guided to DKK 150–200m (H1 2019: DKK 118m), driven by the reversal of impairment charges.

This guidance is generally subject to uncertainty and will, amongst other things, depend on economic conditions, loan impairments and market value adjustments.

The BankNordik Group holds a license to operate as a bank and is therefore subject to a capital requirement under the Faroese Financial Business Act and to CRR. The Faroese provisions on capital requirements apply to both the Parent Company and the Group. The capital requirementprovisions stipulate a minimum capital of 8% of the identified risks. A detailed body of rules determines the calculation of capital as well as risks (risk-weighted items). The capital comprises core capital and subordinated loan capital. The core capital corresponds to the carrying amount of equity, after deductions of holdings of own shares, tax assets and other minor deductions.

#### **Notes**

### **Note Significant accounting policies**

The consolidated financial statements for the first half year of 2019 have been prepared in accordance with IAS 34 "Interim Financial Reporting" supplemented by additional Faroese disclosure requirements for quarterly reports of listed financial companies and in accordance with the financial reporting requirements of the Nasdaq exchange in Copenhagen. The financial statements of the Parent Company, P/F BankNordik, have been prepared in accordance with the Faroese Financial Business Act and with the executive order on financial reports of credit institutions etc. of the Danish FSA as applied in the Faroe Islands.

The application of IAS 34 means that the disclosure of figures is less detailed than the disclosure in a full annual report and that the valuation principles laid down by the international financial reporting standards (IFRS) are applied.

As of January 1, 2019 the Group implemented the International Financial Reporting Standard IFRS 16 (Leases). Otherwise, the Group's significant accounting policies are consistent with those applied in the Annual Report 2018. The Annual Report 2018 provides a full description of the Group's significant accounting policies. In connection with the implementation of IFRS 16, the Group recognised, at January 1, 2019, DKK 91.4m in the balance sheet item Domicile properties and in the balance sheet item Other liabilities.

#### Future financial reporting standards and interpretations

The International Accounting Standards Board (IASB) has issued a number of new accounting standards (IAS and IFRS) and interpretations (IFRIC) that have not yet entered into force. Please refer to the Annual Report 2018 for further information.

#### **Accounting estimates**

The measurement of certain assets and liabilities requires management to estimate how future events will impact on the value of such assets and liabilities. Estimates of significance to the financial reporting are made in connection with determining the impairment of loans and advances, the fair value of unlisted financial instruments, provisions, business acquisitions etc. Estimates are based on assumptions that management considers appropriate but which are inherently uncertain. The most significant estimates that management makes in applying the Group's accounting policies and the most important uncertainty affecting estimates made when preparing the condensed interim report are unchanged from the estimates made in connection with the preparation of the Annual Report 2018 and the uncertainties prevailing at that time.

#### Determination of fair value

The fair value of financial assets is measured on the basis of quoted market prices of financial instruments traded in active markets. If an active market exists, fair value is based on the most recently observed market price at the balance sheet date.

If a financial instrument is quoted in a market that is not active, the Group bases its measurement on the most recent transaction price. Adjustment is made for subsequent changes in market conditions, for instance by including transactions in similar financial instruments that are assumed to be motivated by normal business considerations.

If no active market for standard and simple financial instruments, such as interest rate and currency swaps and unlisted bonds, exists, generally accepted valuation techniques rely on market-based parameters for measuring fair value. The results of calculations made on the basis of valuation techniques are often estimates because exact values cannot be determined from market observations. Consequently, additional parameters, such as liquidity risk and counterparty risk, are sometimes used for measuring fair value.
